The Elaboration Theory was introduced by Charles Reigeluth, an American educational theorist in 1979. The Elaboration Theory was developed by M. David Merrill to work alongside Reigeluth’s Theory, with the first detailing the “micro elements.” Instructional design refers to the systematic process of translating principles of learning theories and principles as developed by Reigeluth, including Keller’s ARCS Model for motivation, Reigeluth’s Elaboration Theory, 4C/ID Model, and others.

Reigeluth Instructional Design Theories
